Yale

New Haven, CT

MSc in Social Anthropology

London School of Economics

London, England

## Shows and Awards

## Found Elements

Tarnish & Gold

1511 Marshall St NE, Minneapolis, MN

April 2-15th, 2011

<http://www.119and120.com/>

Found Elements started as two photographers wanting to make their art real and available to the community; as others were invited into the creative process of interpreting a single concept, the show turned into a brand. As four advertising professionals- two photographers, a writer and a designer- the skills we each brought to the project combined to bring the concept to life.

Centered on collaboration and creativity, expressed through experimentation with many platforms and seen through lenses of all kinds, Found Elements represents the moments of inspiration that artists feel and share. In the end, Found Elements became a representation of the creative process itself.
