

# HandmadeFont.com

UNIQUE, UNTRADITIONAL TYPEFACES.

Tallinn, Estonia

[handmadeFont@gmail.com](mailto:handmadeFont@gmail.com)

We are an Estonia based design company HMF (HandMadeFont.com). It was founded in 2008 by Vladimir Loginov and Maksim Loginov. We specialize in developing unique, untraditional typefaces. We take inspiration from everything that surrounds us. On our website (<http://www.handmadeFont.com>) we offer completed fonts that you can buy and use freely. We would recommend you to buy the whole collection. In that case, it will save you a substantial amount of money and will expand your potential in visualizing Your own projects.

Developed fonts are of such a high standard that they can be very widely used, from business cards to an outdoor advertisement.

Our typefaces, in fact, should provide an alternative to illustration. If you do not have enough time or budget to create or purchase suitable illustration or photo, we will be glad to help You.

Our fonts can be used to create unique: -Headline -Initial -Title -Slogan -Text -Illustration -etc

On our site ([www.handmadeFont.com](http://www.handmadeFont.com)) You have the possibility to buy every font separately. But we would advise You to purchase the whole collection or at least several fonts.

We are very interested in requests for developing new and unique fonts for advertisement campaigns, packing, magazine covers etc. We are always open to any cooperation offers. We work on a various range of commissions across different budgets. Our work has been published among various magazines and journals. We also create different visual communication solutions for a range of clients and industries and our projects involve art direction, branding, stationery, publications, exhibitions, websites, packaging and signage systems.

We make ideas real through beautifully crafted design. We believe good ideas can be applied to anything. Please do not hesitate to contact us for more information.
