Abilify (Aripiprazole) is used for treating schizophrenia and certain symptoms of bipolar disorder.

Abilify (Aripiprazole)

Drug Uses

Abilify is used for treating agitation caused by schizophrenia or bipolar disorder. It may also be used for other conditions as determined by your doctor.

How to use

buy abilify cheap

How to use

Use Abilify as directed by your doctor. Check the label on the medicine for exact dosing instructions.

Abilify is usually given as an injection at your doctor's office, hospital, or clinic. If you will be using Abilify at home, a health care provider will teach you how to use it. Be sure you understand how to use Abilify . Follow the procedures you are taught when you use a dose. Contact your health care provider if you have any questions.

Abilify is for injection deep into the muscle only. Do NOT inject Abilify under the skin or into a vein.

Do not use Abilify if it contains particles, is cloudy or discolored, or if the vial is cracked or damaged.

Keep this product, as well as syringes and needles, out of the reach of children and pets. Do not reuse needles, syringes, or other materials. Ask your health care provider how to dispose of these materials after use. Follow all local rules for disposal.

Drug Class and Mechanism

Abilify is an atypical antipsychotic. Exactly how Abilify works is not known. It affects certain substances in the brain.
