

Mohanad Yajouri

WEB/UI DESIGNER

Toronto, ON, Canada

contact@mohanad.me

User Interface designer and frontend web developer, with focus on web standards, user experience and social web. Worked on many projects ranging from simple social networks to complex, industry-specific, online systems.

Career

Web/UI Designer

Freelance

Toronto, ON, Canada

May 2010 - Present

After a year spent on relocation and study, I got back to freelancing as a web designer and front-end developer.

Web/UI Designer

SpinBits

Dubai, UAE

Dec 2007 - May 2009

While working at Spinbits, I designed a lot of websites and user interfaces for a variety of clients and project types, ranging from simple social networks to complex, industry-specific online systems. I am responsible for handling and delivering the entire front-end part of our projects, starting by planing and wireframing, followed by designing, slicing and XHTML/CSS coding, and ending by testing and delivery. I also handle and followup on all client and team members concerns and communications related to my job throughout the project lifecycle.

Quality Control Executive

Flip Media

Dubai, UAE

Dec 2006 - Nov 2007

As the title implies, my job was mainly to review and examine entire websites at the final stage of production. The goal was to make sure the final product (website) complies with both our proposals and briefs as well as the technical standards relevant to each part of the website. In addition, technical issues/bugs as well as enhancement suggestions needed to be properly tracked and communicated to the remotely-located technical staff.

Web Designer & Front-End Developer

Freelance

Abu Dhabi, UAE

Aug 2005 - Nov 2006

During this period, I designed and developed a few sites and learned a lot about designing with web standards, and UI design methodologies and patterns.

Skills

HTML, CSS, Javascript, Photoshop, Cross-browser Testing
